SUBJECT INDEX

Alkanol
Thermodynamics of ion-pair association. Part 1. Conductance of sodium tetraphenylborate in 1-alkanols 243
Amino acid
Heat capacities of sixteen small peptides (*N*-acetyl-*N'*-methylamino acid amides) measured by differential scanning calorimetry 7
Ammonium compound
Studies on double selenates. Part 12. Thermal decomposition of ammonium selenate and of double selenates of lanthanide, and yttrium, and ammonium 157
Thermoanalytic resolution of hydrogen-influenced reductive events in the decomposition course of ammonium paratungstate 137
Ammonium polyphosphate
Thermal behaviour of ammonium polyphosphate–inorganic compound mixtures. Part 1. Talc 41
Association
Thermodynamics of ion-pair association. Part 1. Conductance of sodium tetraphenylborate in 1-alkanols 243
Atmosphere
Kinetics of the thermal decomposition of dicarboxylic acids 51
Thermoanalytic resolution of hydrogen-influenced reductive events in the decomposition course of ammonium paratungstate 137
Autoignition
A simple method for estimating the autoignition temperature of solid energetic materials with a single non-isothermal DSC or DTA curve 105

Binary system
Identification of the thermal processes in the binary $Cu(NO_3)_2 \cdot 3H_2O$ and $Cr(NO_3)_3 \cdot 9H_2O$ systems 181
Phase diagram of the $FeVO_4$–Fe_2WO_6 system 269
Buffer
The denaturation behaviour of calmodulin in sodium *n*-dodecyl sulphate, dodecyl trimethyl ammonium bromide, guanidine hydrochloride and urea 61

Cadmium compound
Thermal investigation and stereochemical studies of some cyclic ligand complexes of nickel(II), copper(II), zinc(II) and cadmium(II) in the solid state. Part 2 73
Calcium zirconate
Gibbs energy of formation of orthorhombic $CaZrO_3$ 233
Calmodulin
The denaturation behaviour of calmodulin in sodium *n*-dodecyl sulphate, dodecyl trimethyl ammonium bromide, guanidine hydrochloride and urea 61
Calorimetry
Kinetic investigations of microbial metabolism by means of flow calorimeters 17
CaM
The denaturation behaviour of calmodulin in sodium *n*-dodecyl sulphate, dodecyl trimethyl ammonium bromide, guanidine hydrochloride and urea 61
Catalyst
Thermoanalytic resolution of hydrogen-influenced reductive events in the decomposition course of ammonium paratungstate 137
Co-ordination
Thermal investigation and stereochemical studies of some cyclic ligand complexes of nickel(II), copper(II), zinc(II) and cadmium(II) in the solid state. Part 2 73
Conductance
Thermodynamics of ion-pair association. Part 1. Conductance of sodium tetraphenylborate in 1-alkanols 243
Conductivity
Mössbauer spectroscopic and d.c. electrical conductivity study of the thermal decomposition of some iron(II) dicarboxylates 253
Thermal investigation and stereochemical studies of methylamine, diethanolamine, 2,2'-bipyridyl and 1,10-phenanthroline complexes of nickel(II) in the solid state 87
Copper compound
A kinetic and mechanistic study of the thermal decomposition of copper(II) mellitate 211

Thermal investigation and stereochemical studies of some cyclic ligand complexes of nickel(II), copper(II), zinc(II) and cadmium(II) in the solid state. Part 2 73

Copper mellitate
A kinetic and mechanistic study of the thermal decomposition of copper(II) mellitate 211

Coupled technique
Mössbauer spectroscopic and d.c. electrical conductivity study of the thermal decomposition of some iron(II) dicarboxylates 253

CRTA
Shape analysis of the $\alpha-T$ curves obtained by CRTA with constant acceleration of the transformation 171

Decomposition
A kinetic and mechanistic study of the thermal decomposition of copper(II) mellitate 211
Kinetics of the thermal decomposition of dicarboxylic acids 51
Mössbauer spectroscopic and d.c. electrical conductivity study of the thermal decomposition of some iron(II) dicarboxylates 253
Studies on double selenates. Part 12. Thermal decomposition of ammonium selenate and of double selenates of lanthanide, and yttrium, and ammonium 157
Thermal decomposition of rare earth element complexes with 3,4-dihydroxybenzoic acid in air 127
Thermoanalytic resolution of hydrogen-influenced reductive events in the decomposition course of ammonium paratungstate 137

Denaturation
The denaturation behaviour of calmodulin in sodium *n*-dodecyl sulphate, dodecyl trimethyl ammonium bromide, guanidine hydrochloride and urea 61

Dicarboxylate
Mössbauer spectroscopic and d.c. electrical conductivity study of the thermal decomposition of some iron(II) dicarboxylates 253

Dicarboxylic acid
Kinetics of the thermal decomposition of dicarboxylic acids 51

Dihydroxybenzoic acid
Thermal decomposition of rare earth element complexes with 3,4-dihydroxybenzoic acid in air 127

Double selenate
Studies on double selenates. Part 12. Thermal decomposition of ammonium selenate and of double selenates of lanthanide, and yttrium, and ammonium 157

DSC
A kinetic and mechanistic study of the thermal decomposition of copper(II) permanganate 225
A simple method for estimating the autoignition temperature of solid energetic materials with a single non-isothermal DSC or DTA curve 105
Heat capacities of sixteen small peptides (*N*-acetyl-*N'*-methylamino acid amides) measured by differential scanning calorimetry 7
Thermodynamic properties of K_2ZnCl_4 between 5 and 350 K 33

DTA
A simple method for estimating the autoignition temperature of solid energetic materials with a single non-isothermal DSC or DTA curve 105
Mössbauer spectroscopic and d.c. electrical conductivity study of the thermal decomposition of some iron(II) dicarboxylates 253
Phase diagram of the $FeVO_4$–Fe_2WO_6 system 269
Thermal decomposition of rare earth element complexes with 3,4-dihydroxybenzoic acid in air 127
Thermal investigation and stereochemical studies of methylamine, diethanolamine, 2,2'-bipyridyl and 1,10-phenanthroline complexes of nickel(II) in the solid state 87
Thermoanalytic resolution of hydrogen-influenced reductive events in the decomposition course of ammonium paratungstate 137
The denaturation behaviour of calmodulin in sodium *n*-dodecyl sulphate, dodecyl trimethyl ammonium bromide, guanidine hydrochloride and urea 61

DTG
Mössbauer spectroscopic and d.c. electrical conductivity study of the thermal decomposition of some iron(II) dicarboxylates 253
Shape analysis of the $\alpha-T$ curves obtained by CRTA with constant acceleration of the transformation 171
Studies on double selenates. Part 12. Thermal decomposition of ammonium selenate and of double selenates of lanthanide, and yttrium, and ammonium 157
Thermal decomposition of rare earth element complexes with 3,4-dihydroxybenzoic acid in air 127

EMF
Gibbs energy of formation of orthorhombic $CaZrO_3$ 233

Enthalpy
Gibbs energy of formation of orthorhombic $CaZrO_3$ 233
Entropy
Gibbs energy of formation of orthorhombic $CaZrO_3$ 233
Explosive
A simple method for estimating the autoignition temperature of solid energetic materials with a single non-isothermal DSC or DTA curve 105

Gibbs energy
Gibbs energy of formation of orthorhombic $CaZrO_3$ 233
GLC
Mössbauer spectroscopic and d.c. electrical conductivity study of the thermal decomposition of some iron(II) dicarboxylates 253
Goethite
Quantitative thermogravimetric analysis of haematite, goethite and kaolinite in Western Australian iron ores 147
GuHCl
The denaturation behaviour of calmodulin in sodium *n*-dodecyl sulphate, dodecyl trimethyl ammonium bromide, guanidine hydrochloride and urea 61

Haematite
Quantitative thermogravimetric analysis of haematite, goethite and kaolinite in Western Australian iron ores 147
Heat capacity
A kinetic and mechanistic study of the thermal decomposition of copper(II) permanganate 225
Heat capacities of sixteen small peptides (*N*-acetyl-*N'*-methylamino acid amides) measured by differential scanning calorimetry 7
Thermodynamic properties of K_2ZnCl_4 between 5 and 350 K 33

Ion pairs
Thermodynamics of ion-pair association. Part 1. Conductance of sodium tetraphenylborate in 1-alkanols 243
Iron compound
Mössbauer spectroscopic and d.c. electrical conductivity study of the thermal decomposition of some iron(II) dicarboxylates 253
Iron ore
Quantitative thermogravimetric analysis of haematite, goethite and kaolinite in Western Australian iron ores 147
Iron vanadate
Phase diagram of the $FeVO_4$–Fe_2WO_6 system 269
Iron tungstate
Phase diagram of the $FeVO_4$–Fe_2WO_6 system 269
IRS
Identification of the thermal processes in the binary $Cu(NO_3)_2 \cdot 3H_2O$ and $Cr(NO_3)_3 \cdot 9H_2O$ systems 181
Mössbauer spectroscopic and d.c. electrical conductivity study of the thermal decomposition of some iron(II) dicarboxylates 253
Thermal decomposition of rare earth element complexes with 3,4-dihydroxybenzoic acid in air 127

Kaolinite
Quantitative thermogravimetric analysis of haematite, goethite and kaolinite in Western Australian iron ores 147
Kinetics
A kinetic and mechanistic study of the thermal decomposition of copper(II) mellitate 211
Clarification of some kinetic concepts in solid state reactions 1
Kinetic investigations of microbial metabolism by means of flow calorimeters 17
Kinetics of the thermal decomposition of dicarboxylic acids 51
Shape analysis of the $\alpha - T$ curves obtained by CRTA with constant acceleration of the transformation 171
The influence of temperature shifts on the kinetic evaluation of non-isothermal thermogravimetric data 115
Thermoanalytic resolution of hydrogen-influenced reductive events in the decomposition course of ammonium paratungstate 137

Lanthanon
Thermal decomposition of rare earth element complexes with 3,4-dihydroxybenzoic acid in air 127
Studies on double selenates. Part 12. Thermal decomposition of ammonium selenate and of double selenates of lanthanide, and yttrium, and ammonium 157
Ligand
Thermal decomposition of rare earth element complexes with 3,4-dihydroxybenzoic acid in air 127
Thermal investigation and stereochemical studies of some cyclic ligand complexes of nickel(II), copper(II), zinc(II) and cadmium(II) in the solid state. Part 2 73

Mechanism
A kinetic and mechanistic study of the thermal decomposition of copper(II) mellitate 211
The influence of temperature shifts on the kinetic evaluation of non-isothermal thermogravimetric data 115
Metabolism
Kinetic investigations of microbial metabolism by means of flow calorimeters 17
Microbe
Kinetic investigations of microbial metabolism by means of flow calorimeters 17
Mixed chloride
A kinetic and mechanistic study of the thermal decomposition of copper(II) permanganate 225
Thermodynamic properties of K_2ZnCl_4 between 5 and 350 K 33
Mixed salt
Identification of the thermal processes in the binary $Cu(NO_3)_2 \cdot 3H_2O$ and $Cr(NO_3)_3 \cdot 9H_2O$ systems 181
Studies on double selenates. Part 12. Thermal decomposition of ammonium selenate and of double selenates of lanthanide, and yttrium, and ammonium 157
Thermal behaviour of ammonium polyphosphate–inorganic compound mixtures. Part 1. Talc 41
Model
Clarification of some kinetic concepts in solid state reactions 1
Kinetic investigations of microbial metabolism by means of flow calorimeters 17
Shape analysis of the $\alpha - T$ curves obtained by CRTA with constant acceleration of the transformation 171
Moessbauer
Mössbauer spectroscopic and d.c. electrical conductivity study of the thermal decomposition of some iron(II) dicarboxylates 253
Molar heat capacity
Heat capacities of sixteen small peptides (*N*-acetyl-*N'*-methylamino acid amides) measured by differential scanning calorimetry 7

Nickel compound
Thermal investigation and stereochemical studies of methylamine, diethanolamine, 2,2'-bipyridyl and 1,10-phenanthroline complexes of nickel(II) in the solid state 87
Thermal investigation and stereochemical studies of some cyclic ligand complexes of nickel(II), copper(II), zinc(II) and cadmium(II) in the solid state. Part 2 73
Non-isothermal
A simple method for estimating the autoignition temperature of solid energetic materials with a single non-isothermal DSC or DTA curve 105
The influence of temperature shifts on the kinetic evaluation of non-isothermal thermogravimetric data 115
Thermoanalytic resolution of hydrogen-influenced reductive events in the decomposition course of ammonium paratungstate 137
Novel
Shape analysis of the $\alpha - T$ curves obtained by CRTA with constant acceleration of the transformation 171

Optical activity
Heat capacities of sixteen small peptides (*N*-acetyl-*N'*-methylamino acid amides) measured by differential scanning calorimetry 7

Paratungstate
Thermoanalytic resolution of hydrogen-influenced reductive events in the decomposition course of ammonium paratungstate 137
Peptide
Heat capacities of sixteen small peptides (*N*-acetyl-*N'*-methylamino acid amides) measured by differential scanning calorimetry 7
Phase
Phase diagram of the $FeVO_4$–Fe_2WO_6 system 269
A kinetic and mechanistic study of the thermal decomposition of copper(II) permanganate 225
Thermodynamic properties of K_2ZnCl_4 between 5 and 350 K 33
Polymorphism
Phase diagram of the $FeVO_4$–Fe_2WO_6 system 269
Potassium compound
A kinetic and mechanistic study of the thermal decomposition of copper(II) permanganate 225
Thermodynamic properties of K_2ZnCl_4 between 5 and 350 K 33
Program
The influence of temperature shifts on the kinetic evaluation of non-isothermal thermogravimetric data 115
Protein
The denaturation behaviour of calmodulin in sodium *n*-dodecyl sulphate, dodecyl trimethyl ammonium bromide, guanidine hydrochloride and urea 61

Pyrolysis
Thermal investigation and stereochemical studies of methylamine, diethanolamine, 2,2′-bipyridyl and 1,10-phenanthroline complexes of nickel(II) in the solid state 87

RDTA
A graphical method for the detection of the occurrence of thermal processes in mixed systems by means of derivatography 201
Identification of the thermal processes in the binary $Cu(NO_3)_2 \cdot 3H_2O$ and $Cr(NO_3)_3 \cdot 9H_2O$ systems 181

RDTG
A graphical method for the detection of the occurrence of thermal processes in mixed systems by means of derivatography 201
Identification of the thermal processes in the binary $Cu(NO_3)_2 \cdot 3H_2O$ and $Cr(NO_3)_3 \cdot 9H_2O$ systems 181

Reduction
Thermoanalytic resolution of hydrogen-influenced reductive events in the decomposition course of ammonium paratungstate 137

RTA
A graphical method for the detection of the occurrence of thermal processes in mixed systems by means of derivatography 201
Identification of the thermal processes in the binary $Cu(NO_3)_2 \cdot 3H_2O$ and $Cr(NO_3)_3 \cdot 9H_2O$ systems 181

RTG
A graphical method for the detection of the occurrence of thermal processes in mixed systems by means of derivatography 201

SDS
The denaturation behaviour of calmodulin in sodium *n*-dodecyl sulphate, dodecyl trimethyl ammonium bromide, guanidine hydrochloride and urea 61

Selenate
Studies on double selenates. Part 12. Thermal decomposition of ammonium selenate and of double selenates of lanthanide, and yttrium, and ammonium 157

SEM
A kinetic and mechanistic study of the thermal decomposition of copper(II) mellitate 211

Sodium tetraphenyl borate
Thermodynamics of ion-pair association. Part 1. Conductance of sodium tetraphenylborate in 1-alkanols 243

Solid state
Clarification of some kinetic concepts in solid state reactions 1

Stereochemical
Thermal investigation and stereochemical studies of some cyclic ligand complexes of nickel(II), copper(II), zinc(II) and cadmium(II) in the solid state. Part 2 73

Stereochemistry
Thermal investigation and stereochemical studies of methylamine, diethanolamine, 2,2′-bipyridyl and 1,10-phenanthroline complexes of nickel(II) in the solid state 87

TA
A simple method for estimating the autoignition temperature of solid energetic materials with a single non-isothermal DSC or DTA curve 105

Talc
Thermal behaviour of ammonium polyphosphate–inorganic compound mixtures. Part 1. Talc 41

Temperature shift
The influence of temperature shifts on the kinetic evaluation of non-isothermal thermogravimetric data 115

TG
Clarification of some kinetic concepts in solid state reactions 1
Kinetics of the thermal decomposition of dicarboxylic acids 51
Quantitative thermogravimetric analysis of haematite, goethite and kaolinite in Western Australian iron ores 147
Studies on double selenates. Part 12. Thermal decomposition of ammonium selenate and of double selenates of lanthanide, and yttrium, and ammonium 157
The influence of temperature shifts on the kinetic evaluation of non-isothermal thermogravimetric data 115
Thermal behaviour of ammonium polyphosphate–inorganic compound mixtures. Part 1. Talc 41
Thermal decomposition of rare earth element complexes with 3,4-dihydroxybenzoic acid in air 127
Thermal investigation and stereochemical studies of methylamine, diethanolamine, 2,2′-bipyridyl and 1,10-phenanthroline complexes of nickel(II) in the solid state 87
Thermoanalytic resolution of hydrogen-influenced reductive events in the decomposition course of ammonium paratungstate 137

TGA
Mössbauer spectroscopic and d.c. electrical conductivity study of the thermal decomposition of some iron(II) dicarboxylates 253

Thermal investigation and stereochemical studies of some cyclic ligand complexes of nickel(II), copper(II), zinc(II) and cadmium(II) in the solid state. Part 2 73

Thermodynamics

A kinetic and mechanistic study of the thermal decomposition of copper(II) permanganate 225

Thermodynamic properties of K_2ZnCl_4 between 5 and 350 K 33

Thermodynamics of ion-pair association. Part 1. Conductance of sodium tetraphenylborate in 1-alkanols 243

Tungstate

Phase diagram of the $FeVO_4$–Fe_2WO_6 system 269

Urea

The denaturation behaviour of calmodulin in sodium *n*-dodecyl sulphate, dodecyl trimethyl ammonium bromide, guanidine hydrochloride and urea 61

Vanadate

Phase diagram of the $FeVO_4$–Fe_2WO_6 system 269

XRD

Identification of the thermal processes in the binary $Cu(NO_3)_2 \cdot 3H_2O$ and $Cr(NO_3)_3 \cdot 9H_2O$ systems 181

Mössbauer spectroscopic and d.c. electrical conductivity study of the thermal decomposition of some iron(II) dicarboxylates 253

Phase diagram of the $FeVO_4$–Fe_2WO_6 system 269

Quantitative thermogravimetric analysis of haematite, goethite and kaolinite in Western Australian iron ores 147

Thermal behaviour of ammonium polyphosphate–inorganic compound mixtures. Part 1. Talc 41

Thermal decomposition of rare earth element complexes with 3,4-dihydroxybenzoic acid in air 127

Zinc compound

A kinetic and mechanistic study of the thermal decomposition of copper(II) permanganate 225

Thermal investigation and stereochemical studies of some cyclic ligand complexes of nickel(II), copper(II), zinc(II) and cadmium(II) in the solid state. Part 2 73

Thermodynamic properties of K_2ZnCl_4 between 5 and 350 K 33

Zirconate

Gibbs energy of formation of orthorhombic $CaZrO_3$ 233
